RE: PEX2025/0001 - 13 Wilga Street INGLESIDE NSW 2101

Hello, I object to this proposal due to a few reasons:

1. The proposal seems to involve building of many surrounding properties to the Serbian Orthodox Church where there does not appear to be planning for how traffic will flow from the Church to Terry Hills or to Narrabeen. This means that a small road will be heavily congested which will create issues when the Church hosts weddings, Christenings, events, funerals and weekly Sunday (and other Saint Day) Church services.
2. The proposal will create nature stress interfering with natural native animal and plant habitats.
3. The Church will most likely loose valuable community land, this in itself is disappointing as the community has worked very hard to create a Church environment and community so that existing and new generations can hold onto and carry forward their culture.
4. The existing Church will receive many complaints due to 'noise' from Church service bells, sports activities and social events where music and singing are present as this is a part of the communities culture.
5. Religious and cultural respect.
6. Parking concerns.
7. Preservation of cultural activities.
