GENERAL NOTES

\* FOR DEVELOPMENT APPLICATION ONLY

\* All tree dimensions and RLs in metres. All other dimensions in mm unless stated otherwise.

\* Do not scale from drawings. Use figured dimensions only. Larger scale drawings and written dimensions take preference.

\* All work shall be carried out in accordance with current versions of Australian Standards, BCA and Local Government Regulations.

\* Structural Details are indicative only and are subject to Structural Engineer's Details and Specifications.

\* Drainage details are subject to Hydraulic / Civil Engineer's Detail and Specification.

\* Subbase details including compaction are to Civil and Structural Engineer's Specification.

\* Lighting Plans are subject to detailed design by a qualified Lighting Consultant or Electrical Contractor.

\* Water Feature Details are indicative only and are subject to detailed design by a specialist Water Feature designer.

\* Service location on plans are indicative only. *360 Degrees Landscape Architects Pty Ltd* accepts no responsibility for the accuracy of service locations shown or for services not shown. It is the responsibility of the contractor to determine service locations prior to the commencement of work, including contacting *Dial Before You Dig* and performing on site service locations. Locate and protect all services on site and in adjacent public domain. Any damages to services and associated damages remains the responsibility of the contractor and shall be rectified at no cost to the client or any other party.

\*All adjoining property elements including but not limited to buildings, walls, trees and paving to be protected. Damaged elements remain the responsibility of the contractor and shall be rectified at no cost to the client or any other party.

\* Existing trees to be retained are to be protected to Council and Project Arborist's requirements. No vehicular traffic, stockpiling or storage of materials within Tree Protection Zones (TPZs).

\* No responsibility will be taken by *360 Degrees Landscape Architects Pty Ltd* for any variations in design, construction method, materials specified and general specifications without permission from the Project Landscape Architect.

\* This Drawing is copyright to *360 Degrees Landscape Architects Pty Ltd*.

IRRIGATION NOTES

\* Irrigation by specialist D&C Irrigation Consultant in accordance with the Performance Specification in the Landscape Technical Specification. Refer to Irrigation Consultant documentation for details and requirements of landscape irrigation system.

\* Irrigation is to comply with Council Conditions of Consent and Water Authorities.

\* All turf and garden beds within the site boundary are to be irrigated unless stated otherwise.

\* Irrigation must be spaced at min. 200 centres and adjusted according to plant setout to provide adequate irrigation to all plants.

\* Drip irrigation is to be fully concealed by 75mm minimum of mulch.

PLANT SCHEDULE

LANDSCAPE STATEMENT

The proposed DA Landscape Drawings for 92 Lauderdale Avenue, Fairlight have been designed and set out in accordance with;

- The Client’s Brief
- The Northern Beaches Council DCP Documents & LEP
- Architectural plans by Archer Office

As part of a collaborative design team, 360 Degrees Landscape Architects propose to support the client's requirements, architectural function and character through considered and refined landscape design, while also responding to the Northern Beaches Council development guidelines and character within the surrounding area.

The proposed landscape will increase the site's existing landscape offerings while maintaining landscape areas and deep soil zones for all proposed tree and garden beds, providing usable and attractive garden spaces.

The front landscape has been designed to flow from the front entry steps through to the rear garden via the east and west side of the site, creating the effect of a continuous landscape and enveloping the proposed architecture within the site. Proposed retaining walls, steps and steppers are noted as sandstone to maintain the language of the site. Hard elements in the front landscape are also proposed to be recessive in finish to allow the predominately native planting to lend itself to the surrounding Fairlight character.

The proposed rear landscape works hand in hand with the proposed architecture to provide open lawn area and terraced garden beds and steps that lead up to the pool terrace. The proposed planting in the rear landscape is continuous to the style of the front, picking up on coastal and native tones and mixed foliage. The proposed swimming pool has been set at a level which maximises the views to the garden and house and improves the usability of the overall site, allowing for the pool to be used separately to the open lawn area in the rear garden and creating a separate zone of activity. The surrounding planting is intended to nestle the structure in the landscape.

The proposed planting consists of mixed native and exotic shrubs and groundcovers suitable for the site's coastal environment and additional semi-mature planting of native and non-native trees and palms which will provide shade for the garden while maintaining view lines of the harbour for the neighboring properties.

The proposed design meets the required Landscape Area percentages set by Northern Beaches Council. This information is noted specifically within the Landscape DA package.

Ultimately the design seeks to provide an attractive and usable environment that compliments the local character while improving and strengthening its function to create landscaped garden spaces for the residents to enjoy.

LANDSCAPE DIAGRAMS

TOTAL SITE AREA = 824.90m<sup>2</sup>

OPEN SPACE AREA

**OPEN SPACE AREA = 560m<sup>2</sup>**
