1. Introduction and Background Information

1.1 Introduction

This report has been prepared as supporting documentation for a Development Application for the proposed alterations and additions to the existing dwelling house, swimming pool, detached carport and associated works at 5 Crawford Place, Beacon Hill, being Lot 23 within Deposited Plan 217829.

This report has been prepared following instructions from the clients Mark Berridge and Marion Bardin. In preparing this application consideration has been given to the following:

- Environmental Planning and Assessment Act, 1979 (as amended) (EP&A Act);
- Environmental Planning and Assessment Regulation 2021;
- Relevant State Environmental Planning Policies;
- Warringah Local Environmental Plan 2011 (WLEP 2011);
- Warringah Development Control Plan (WDCP);
- Survey Plan prepared by CMS Surveyors Pty Ltd;
- Architectural Plans prepared by Action Plans Pty Ltd;
- Geotechnical Report prepared by Ascent Geotechnical;
- Stormwater Management Plan prepared by Harris Page & Associates Pty Ltd;
- Arboricultural Impact Assessment Report prepared by Hugh the Arborist;
- BASIX Certificate prepared by Action Plans Pty Ltd;
- Waste Management Plan.

This Statement of Environmental Effects describes the proposed development having particular regard to the provisions of Section 4.15 of the EP&A Act 1979 and examines any potential environmental impacts with regard to the relevant sections of the Act, State policies and requirements of Northern Beaches Council's WDCP.

The conclusions of the Statement of Environmental Effects are that the proposed development, being alterations and additions to the existing dwelling house, swimming pool, detached carport and associated works is permissible with development consent and is consistent with the relevant statutory planning instruments including Warringah Local Environmental Plan 2011 and relevant planning policies of Warringah Development Control Plan.

Accordingly, the Development Application succeeds on its merits and should be approved by Council, as submitted.

1.2 Background Information

The site is not the subject of any recent Development Applications to Northern Beaches Council. The proposal was not the subject of a pre-lodgement meeting with Northern Beaches Council.

2. Site Profile

2.1 Property Description

The subject allotment is described as 5 Crawford Place, Beacon Hill, being Lot 23 within Deposited Plan 217829. The site is zoned R2 Low Density Residential under Warringah Local Environmental Plan 2011.

The site is not listed as a heritage item, nor is it located within a heritage conservation area.

2.2 Site and Locality Description

The site is located on the southern side of Crawford Place, east of the intersection with Kandra Road. The site is rectangular in shape with a 15.24m frontage to Crawford Place and a site depth of 38.26m. The property has existing vehicular access to Crawford Place at the eastern end of the street frontage. The site has a total area of 583.1sqm. The site has a steep topography sloping approximately 3.5m across the site from the north-western corner to the south-eastern corner of the allotment. The site is currently occupied by a 1 and 2 storey brick dwelling house with a tiled roof, with the southern side of Crawford Place retaining a majority two (2) storey-built form.

The locality maps below show the location and area of the site:

3. Proposal

The proposed development is for alterations and additions to the existing dwelling house, swimming pool, detached carport and associated works. The proposal remains consistent with the bulk and scale and two storey appearance of the locality. The proposal is consistent with the streetscape of Crawford Place and surrounding dwellings. The proposed works include the following:

Demolition Works

Demolition works as depicted on architectural plan DA03, DA05 and DA06 prepared by Action Plans Pty Ltd.

Dwelling House

Lower Ground Floor – Alterations and Additions

- Storage/underhouse
- WC
- Laundry
- Stairs

Ground Floor – Alterations and Additions

- Entry
- Stairs
- Living
- Dining
- Kitchen with WIP
- 2nd living
- Powder room
- Guest bed with ensuite

First Floor – New Addition

- Stairs
- Bed 1
- Bed 2
- Master bed with WIR and ensuite
- F. Bath

External

- North-facing front verandah and porch with outdoor kitchen
- Swimming pool and associated concourse area
- Two (2) vehicle carport
- Revised driveway to replace existing
- South-facing deck and external staircase
- Levelled front lawn
- Front boundary fence with separate vehicle and pedestrian access gate
- Associated paving, planters and landscaping works

^{*}Refer to architectural plans prepared by Action Plans Pty Ltd for a full description of all works.

4. Statutory Planning Controls

The proposal has been assessed in accordance with the following instruments and controls:

- Environmental Planning and Assessment Act 1979, and Environmental Planning and Assessment Regulation 2021;
- State Environmental Planning Policies;
- Warringah Local Environmental Plan 2011; and
- Warringah Development Control Plan.

4.1 Environmental Planning and Assessment Act 1979 (EP&A Act 1979) and Environmental Planning and Assessment Regulation 2021 (EP&A Regulation 2021)

The EP&A Act 1979 governs all environmental planning instruments within New South Wales. The proposal has been reviewed pursuant to the matters for consideration within Section 4.15 of the EP&A Act 1979.

The proposal is not Designated Development under Section 4.10 of the EP& A Act 1979 or Schedule 3 of the EPA Assessment Regulation 2021, therefore Northern Beaches Council is the Consent Authority. In addition, the proposal does not constitute an Integrated Development under the EP&A Act 1979, Section 4.46 with no further approvals from other Government agencies required.

4.2 State Environmental Planning Policies (SEPPs)

SEPP (Transport and Infrastructure) 2021

It is submitted that the proposal complies with the relevant provisions of SEPP (Transport and Infrastructure) 2021 and therefore no further assessment is required.

SEPP (Sustainable Buildings) 2022

The proposal has been assessed in accordance with the relevant provisions of the BASIX and Energy Efficiency. A BASIX Certificate has been prepared by Action Plans Pty Ltd and outlines the proposal's compliance with the provisions of BASIX and Energy Efficiency.

SEPP (Resilience and Hazards) 2021

Chapter 4 of the SEPP (Resilience and Hazards) 2021 requires the consent authority to consider whether land is contaminated prior to granting of consent to the carrying out of any development on that land.

- 4.6 Contamination and remediation to be considered in determining development application
- (1) A consent authority must not consent to the carrying out of any development on land unless—
 - (a) it has considered whether the land is contaminated, and
 - (b) if the land is contaminated, it is satisfied that the land is suitable in its contaminated state (or will be suitable, after remediation) for the purpose for which the development is proposed to be carried out, and
 - (c) if the land requires remediation to be made suitable for the purpose for which the development is proposed to be carried out, it is satisfied that the land will be remediated before the land is used for that purpose.

- (2) Before determining an application for consent to carry out development that would involve a change of use on any of the land specified in subsection (4), the consent authority must consider a report specifying the findings of a preliminary investigation of the land concerned carried out in accordance with the contaminated land planning guidelines.
- (3) The applicant for development consent must carry out the investigation required by subsection (2) and must provide a report on it to the consent authority. The consent authority may require the applicant to carry out, and provide a report on, a detailed investigation (as referred to in the contaminated land planning guidelines) if it considers that the findings of the preliminary investigation warrant such an investigation.
- (4) The land concerned is—
 - (a) land that is within an investigation area,
 - (b) land on which development for a purpose referred to in Table 1 to the contaminated land planning guidelines is being, or is known to have been, carried out,
 - (c) to the extent to which it is proposed to carry out development on it for residential, educational, recreational or child care purposes, or for the purposes of a hospital—land—
 - (i) in relation to which there is no knowledge (or incomplete knowledge) as to whether development for a purpose referred to in Table 1 to the contaminated land planning quidelines has been carried out, and
 - (ii) on which it would have been lawful to carry out such development during any period in respect of which there is no knowledge (or incomplete knowledge).

It is submitted that the site has been used for the purpose of residential accommodation for decades. The builder/contractors should take all measures to ensure if contamination is found during construction that relevant procedures are followed to report and remove contaminated materials. A site inspection was undertaken with no visible landfill. On the basis of the above, the site is considered low risk and no further assessment is required.

State Environmental Planning Policy (Biodiversity and Conservation) 2021

State Environmental Planning Policy (Biodiversity and Conservation) 2021 relates to various rescinded SEPPS that related to the preservation of trees and vegetation, koala habitat and bushland in urban areas.

The aims of this Policy are to protect the biodiversity values of trees and other vegetation, and to preserve the amenity of non-rural areas of the State through the preservation of trees and other vegetation.

The proposal includes the removal of three (3) trees consisting of two (2) low-retention value category Z trees and one (1) category A tree. The application is supported by an Arboricultural Impact Assessment prepared by Hugh the Arborist. The proposal has been designed with regards to mitigate, minimise and avoid. The trees impacting the development are not significant to warrant retention and the proposal meets the relevant provisions of the SEPP.

4.3 Warringah Local Environmental Plan 2011 (WLEP2011)

The relevant matters to be considered under the WLEP2011 are outlined below in the LEP summary compliance table.

	Part 1: Preliminary			
Standard	Control	Comments		
1.2 Aims of	(d) in relation to residential	Complies – the proposal relates to		
Plan	development, to—	alterations and additions to the existing		
	(i) protect and enhance the	dwelling house, the construction of a		
	residential use and amenity of existing	swimming pool, detached carport and		
	residential environments, and	associated structures. The		
	(ii) promote development that is	development is compatible with the		
	compatible with neighbouring	residential development in the		
	development in terms of bulk, scale	immediate area and is consistent with		
	and appearance, and	the bulk and scale of residential		
	(iii) increase the availability and	development in the locality. The		
	variety of dwellings to enable	proposed development will provide a		
	population growth without having	new modern and functional dwelling in		
	adverse effects on the character and	Beacon Hill.		
	amenity of Warringah.			

Part 4: Principal Development Standards			
Standard	Permitted	Proposed	Comments
4.1 Minimum subdivision lot size	600sqm	N/A	N/A – no change to existing lot size.
4.1AA Minimum subdivision lot size for community title schemes	N/A	N/A	N/A
4.2 Rural subdivision	N/A	N/A	N/A
4.2A Minimum subdivision lot size for strata subdivision of residential or tourist and visitor accommodation in certain zones 4.3 Height of buildings	N/A	N/A 8.70m	N/A Merit assessment – 200mm variation
4.3 Height of buildings	8.5111	8.70m	proposed. Refer to accompanying Clause 4.6 request.
4.4 Floor space ratio	N/A	N/A	N/A
4.5 Calculation of floor space ratio and site area	Noted	N/A	Noted
4.6 Exceptions to development standards	Noted	Yes – Clause 4.3 Building Height	The development application is supported by a Clause 4.6 Variation to justify a variation in the maximum building height for the site.

Part 5: Miscellaneous Provisions			
Provisions	Comments		
5.1 Relevant acquisition authority	N/A		
5.1A Development on land	N/A		
intended to be acquired for a			
public purpose			
5.2 Classification and	N/A		
reclassification of public land	,		
5.3 Development near zone	N/A		
boundaries	,		
5.4 Controls relating to	N/A		
miscellaneous permissible uses	,		
5.5 Controls relating to secondary	N/A		
dwellings on land in a rural zone			
5.6 Architectural roof features	N/A		
5.7 Development below mean high	N/A		
water mark			
5.8 Conversion of fire alarms	N/A		
5.9 Dwelling house or secondary	N/A		
dwelling affected by natural	,		
disaster			
5.9AA (Repealed)	N/A		
5.10 Heritage conservation	N/A – the subject site is not identified as a heritage item or		
	within a conservation area.		
5.11 Bush fire hazard reduction	N/A		
5.12 Infrastructure development	N/A		
and use of existing buildings of the			
Crown			
5.13 Eco-tourist facilities	N/A		
5.14 Siding Spring Observatory –	N/A		
maintaining dark sky			
5.15 Defence communications	N/A		
facility			
5.16 Subdivision of, or dwellings	N/A		
on, land in certain rural, residential			
or environmental protection zones			
5.17 Artificial waterbodies in	N/A		
environmentally sensitive areas in			
areas of operation of irrigation			
corporations			
5.18 Intensive livestock agriculture	N/A		
5.19 Pond-based, tank-based and	N/A		
oyster aquaculture			
5.20 Standards that cannot be	N/A		
used to refuse consent—playing			
and performing music			
5.21 Flood planning	N/A – the subject site is not identified within Council's Flood		
	Hazard Map.		
5.22 Special flood considerations	N/A		
5.23 Public Bushland	N/A		

5.24 Farm stay accommodation	N/A
5.25 Farm gate premises	N/A

Part 6: Relevant Additional Local Provisions			
Provisions	Comments		
6.1 Acid sulfate soils	N/A – the site is not identified within the acid sulfate soils		
	map.		
6.2 Earthworks	The proposed excavation/fill works comply with Clause 6.2.		
	The proposal is supported by a geotechnical report		
	prepared by Ascent Geo. Refer to assessment under		
	Heading 6.2 Earthworks.		
6.3 (Repealed)	N/A		
6.4 Development on sloping land	The site is identified within Area B Landslip Risk. The		
	development application is supported by a Geotechnical		
	Report prepared by Ascent Geo. Refer to assessment under		
	Heading 6.4 Development on Sloping Land.		
6.5 Coastline hazards	N/A		
6.6 Erection of dwelling houses in	N/A		
Zone C3 Environmental			
Management			
6.7 (Repealed)	N/A		
6.8 Subdivision of certain land	N/A		
6.9 Location of sex service	N/A		
premises			
6.10 Development for the purposes	N/A		
of secondary dwellings in zones R2			
and R3			
6.11 Affordable housing	N/A		

Part 7: Dee Why Town Centre		
Provisions	Comments	
7.1 to 7.14	N/A – the site is not located within Dee Why Town Centre.	

Part 8: Frenchs Forest Precinct		
Provisions	Comments	
8.1 to 8.11	N/A – the site is not located within the Frenchs Forest precinct.	

Relevant Schedules		
Schedule	Comments	
Schedule 1 – Additional permitted uses	N/A	
Schedule 2 – Exempt development	N/A	
Schedule 3 – Complying development	N/A	
Schedule 4 – Classification and reclassification	N/A	
of public land		
Schedule 5 – Environmental heritage	N/A	
Schedule 6 – Pond-based and tank-based	N/A	
aquaculture		

The relevant matters to be considered under the WLEP2011 are outlined below:

Zone R2 Low Density Residential

1 Objectives of zone

- To provide for the housing needs of the community within a low density residential environment.
- To enable other land uses that provide facilities or services to meet the day to day needs of residents.
- To ensure that low density residential environments are characterised by landscaped settings that are in harmony with the natural environment of Warringah.

2 Permitted without consent

Home-based child care; Home occupations

3 Permitted with consent

Bed and breakfast accommodation; Boat sheds; Building identification signs; Business identification signs; Centre-based child care facilities; Community facilities; Dwelling houses; Educational establishments; Emergency services facilities; Environmental protection works; Exhibition homes; Group homes; Health consulting rooms; Home businesses; Hospitals; Oyster aquaculture; Places of public worship; Pond-based aquaculture; Recreation areas; Respite day care centres; Roads; Secondary dwellings; Tank-based aquaculture; Veterinary hospitals

4 Prohibited

Any development not specified in item 2 or 3

Comment:

The site is zoned R2 Low Density Residential. A dwelling house is a permissible land use within the R2 Low Density Residential zone with consent of Northern Beaches Council, therefore the proposed alterations and additions are permissible on the site. The development meets the objectives of the zone by providing for the housing needs of the community while ensuring the locality continues to be characterized by a landscaped setting.

Part 4 Principal development standards

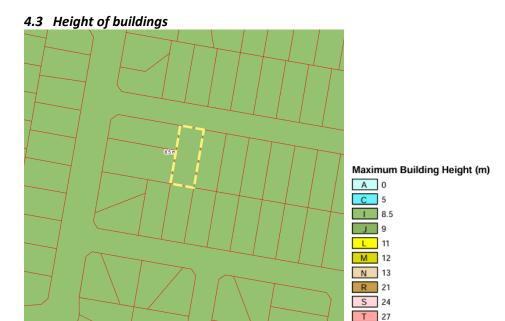

- (1) The objectives of this clause are as follows—
 - (a) to protect residential character by providing for the subdivision of land that results in lots that are consistent with the pattern, size and configuration of existing lots in the locality,
 - (b) to promote a subdivision pattern that results in lots that are suitable for commercial and industrial development,
 - (c) to protect the integrity of land holding patterns in rural localities against fragmentation,
 - (d) to achieve low intensity of land use in localities of environmental significance,
 - (e) to provide for appropriate bush fire protection measures on land that has an interface to bushland,
 - (f) to protect and enhance existing remnant bushland,
 - (g) to retain and protect existing significant natural landscape features,
 - (h) to manage biodiversity,
 - (i) to provide for appropriate stormwater management and sewer infrastructure.
- (2) This clause applies to a subdivision of any land shown on the <u>Lot Size Map</u> that requires development consent and that is carried out after the commencement of this Plan.
- (3) The size of any lot resulting from a subdivision of land to which this clause applies is not to be less than the minimum size shown on the Lot Size Map in relation to that land.
- (3A) For the purposes of subclause (3), in calculating the size of a lot the area of any access corridor (including any right of carriageway, access way or other area that provides for vehicle access) is to be excluded, whether the access corridor is to be created or is in existence at the time of the application for development consent for the subdivision.
- (4) This clause does not apply in relation to the subdivision of any land—
 - (a) by the registration of a strata plan or strata plan of subdivision under the <u>Strata Schemes</u> <u>Development Act 2015</u>, or
 - (b) by any kind of subdivision under the Community Land Development Act 2021.

Comment:

Not applicable – the site has a minimum lot size of 600sqm. The proposal does not change the lot size of the property, nor does it propose any subdivision. Clause 4.1 is not applicable to this assessment.

- (1) The objectives of this clause are as follows—
 - (a) to ensure that buildings are compatible with the height and scale of surrounding and nearby development,
 - (b) to minimise visual impact, disruption of views, loss of privacy and loss of solar access,
 - (c) to minimise any adverse impact of development on the scenic quality of Warringah's coastal and bush environments,
 - (d) to manage the visual impact of development when viewed from public places such as parks and reserves, roads and community facilities.
- (2) The height of a building on any land is not to exceed the maximum height shown for the land on the <u>Height of Buildings Map</u>.
- (2A) If the <u>Height of Buildings Map</u> specifies, in relation to any land shown on that map, a Reduced Level for any building on that land, any such building is not to exceed the specified Reduced Level.

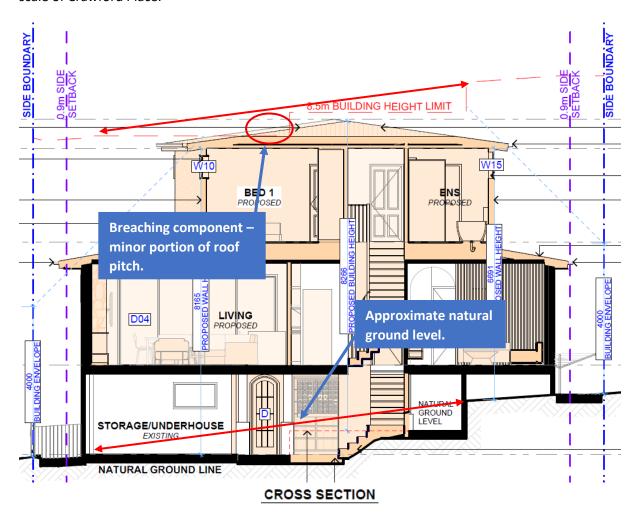

Comment:

The site has a maximum building height provision of 8.5m. The proposal has a building height of 8.70m which requests a variation by 200mm (or 2.35%). The Development Application is supported by a Clause 4.6 Variation to Development Standard report. It is noted that the breach is the result of the sloping nature of the site and the existing man-made changes. The proposed minor breach relates to elements of the roof structure where the existing excavated levels have distorted the height plane for the site influencing minor components of the first floor roof structure to exceed the 8.5m maximum building height as the topography of the site falls to the east. The remaining components towards the west of the property have been sited below the 8.5m control. It is submitted that the proposal is consistent with the desired future character of Crawford Place, and in our opinion is consistent with the objectives of the Clause, as outlined below:

(a) to ensure that buildings are compatible with the height and scale of surrounding and nearby development,

The proposed development is compatible with the height and scale of surrounding and nearby development, and with the desired future character of the locality noting the capacity for development in the street. It is noted that notwithstanding the proposed breach to the building height, the proposal is below the maximum building height for the majority of the proposed dwelling and when you take into consideration the topography and man-made level changes existing on the site, the proposal would achieve full compliance if the natural ground level was taken (as

demonstrated by the extract from the architectural plans below). Notwithstanding the proposed breach to the building height, the approval would not result in significant impacts to the bulk and scale of Crawford Place.

The proposal is compatible with the height and scale of surrounding and nearby development and with the desired future character of the locality noting the capacity for development in the street. Refer to the streetscape and visual analysis which outlines the bulk and scale and single to two storey nature of Crawford Place with building heights in excess of 8.5m. It is important for Council to recognise and acknowledge the existing streetscape of Crawford Place and recent approvals with two storey dwelling houses with encroachments to the maximum 8.5m height limit (1 Kandra Road – 3.5% variation). It is our professional opinion that the proposed minor non-compliance will have no adverse impact on the existing streetscape, and the proposed dwelling will not be out of character or incompatible with the locality. On the basis of the above, it is our professional opinion that the proposal meets objective (a).

(b) to minimise visual impact, disruption of views, loss of privacy and loss of solar access,

The proposal has been strategically designed by the project designer to have compliant and varying side setbacks and a near fully compliant side boundary envelope. The proposal will not have a visual impact, will not adversely disrupt views, will not increase privacy or amenity impacts and will not create an unreasonable loss of solar access. It is our professional opinion that the proposal satisfies this objective and can be supported by Council as submitted.

(c) to minimise any adverse impact of development on the scenic quality of Warringah's coastal and bush environments,

The project designers have strategically designed the proposal to integrate seamlessly into the existing streetscape of Crawford Place which promotes facets of Warringah's coastal and bush environments through high quality finishes and design. This objective is met.

(d) to manage the visual impact of development when viewed from public places such as parks and reserves, roads and community facilities.

The proposed development will be of an appropriate and sympathetic bulk and scale consistent with surrounding development in the street. Accordingly, the visual impact of the development when viewed from public places is negligible. This objective is met.

It is our professional opinion that the building by virtue of its height, bulk and scale, is consistent with the locality and desired character of the area. We have formed the considered opinion that the proposal is a sympathetic design with a bulk and scale consistent with the existing and future character of the area. The proposal is not offensive, or unsympathetic in a streetscape context nor the context from Crawford Place, and therefore the building height as proposed, can be supported by Northern Beaches Council.

4.4 Floor space ratio

Comment:

Not applicable.

4.6 Exceptions to development standards

- (1) The objectives of this clause are as follows—
 - (a) to provide an appropriate degree of flexibility in applying certain development standards to particular development,
 - (b) to achieve better outcomes for and from development by allowing flexibility in particular circumstances.
- (2) Development consent may, subject to this clause, be granted for development even though the development would contravene a development standard imposed by this or any other environmental planning instrument. However, this clause does not apply to a development standard that is expressly excluded from the operation of this clause.
- (3) Development consent must not be granted to development that contravenes a development standard unless the consent authority is satisfied the applicant has demonstrated that—
 - (a) compliance with the development standard is unreasonable or unnecessary in the circumstances, and
 - (b) there are sufficient environmental planning grounds to justify the contravention of the development standard.

Note-

The <u>Environmental Planning and Assessment Regulation 2021</u> requires a development application for development that proposes to contravene a development standard to be accompanied by a document setting out the grounds on which the applicant seeks to demonstrate the matters in paragraphs (a) and (b).

- (4) The consent authority must keep a record of its assessment carried out under subclause (3).
- (5) (Repealed)
- (6) Development consent must not be granted under this clause for a subdivision of land in Zone RU1 Primary Production, Zone RU2 Rural Landscape, Zone RU3 Forestry, Zone RU4 Primary Production Small Lots, Zone RU6 Transition, Zone R5 Large Lot Residential, Zone C2 Environmental Conservation, Zone C3 Environmental Management or Zone C4 Environmental Living if—

- (a) the subdivision will result in 2 or more lots of less than the minimum area specified for such lots by a development standard, or
- (b) the subdivision will result in at least one lot that is less than 90% of the minimum area specified for such a lot by a development standard.

Note.

When this Plan was made it did not contain Zone RU1 Primary Production, Zone RU2 Rural Landscape, Zone RU3 Forestry, Zone RU6 Transition or Zone R5 Large Lot Residential.

- (7) (Repealed)
- (8) This clause does not allow development consent to be granted for development that would contravene any of the following—
 - (a) a development standard for complying development,
 - (b) a development standard that arises, under the regulations under the Act, in connection with a commitment set out in a BASIX certificate for a building to which <u>State Environmental Planning Policy (Building Sustainability Index: BASIX) 2004</u> applies or for the land on which such a building is situated,
 - (ba) clause 4.4, to the extent that it applies to land identified on the <u>Key Sites Map</u> as Site F, Site G, Site H or Site I,
 - (c) clause 5.4,
 - (caa) clause 5.5.
 - (d) (Repealed)
- (8A) Also, this clause does not allow development consent to be granted for development that would contravene a development standard for the maximum height of a building shown on the <u>Height of Buildings Map</u> on land shown on the <u>Centres Map</u> as the Dee Why Town Centre.
- (8B) Despite subclause (8A), development on Site C or Site E may exceed the maximum height of building shown on the <u>Height of Buildings Map</u> if the maximum height is allowable under clause 7.14.

Comment:

The proposal has a non-compliance to the building height by 200mm (or 2.35%). The Development Application is supported by a Clause 4.6 Variation to Development Standard report which outlines that the objectives of Clause 4.6 are achieved and flexibility to the building height should be applied.

Part 5 Miscellaneous provisions

5.10 Heritage conservation

Comment

Not applicable – the site is not identified as a heritage item nor is it located within a conservation area.

5.21 Flood planning

Comment:

Not applicable – the subject site is not identified within Council's Flood Hazard Map.

Part 6 Additional local provisions

6.1 Acid sulfate soils

Comment:

Not applicable – the site is not identified within the acid sulfate soils map.

6.2 Earthworks

(1) The objectives of this clause are as follows—

- (a) to ensure that earthworks for which development consent is required will not have a detrimental impact on environmental functions and processes, neighbouring uses, cultural or heritage items or features of the surrounding land,
- (b) to allow earthworks of a minor nature without requiring separate development consent.
- (2) Development consent is required for earthworks unless—
 - (a) the work is exempt development under this Plan or another applicable environmental planning instrument, or
 - (b) the work is ancillary to other development for which development consent has been given.
- (3) Before granting development consent for earthworks, the consent authority must consider the following matters—
 - (a) the likely disruption of, or any detrimental effect on, existing drainage patterns and soil stability in the locality,
 - (b) the effect of the proposed development on the likely future use or redevelopment of the land,
 - (c) the quality of the fill or the soil to be excavated, or both,
 - (d) the effect of the proposed development on the existing and likely amenity of adjoining properties,
 - (e) the source of any fill material and the destination of any excavated material,
 - (f) the likelihood of disturbing relics,
 - (g) the proximity to and potential for adverse impacts on any watercourse, drinking water catchment or environmentally sensitive area.

Note. The <u>National Parks and Wildlife Act 1974</u>, particularly section 86, deals with disturbing or excavating land and Aboriginal objects.

Comment:

Complies – the proposal requires minor excavation of the site. The development application is supported by a geotechnical assessment prepared by Ascent Geo. The conclusions of the report are provided below under Heading Clause 6.4 Development of Sloping Land. The proposed earthworks comply with the objectives of Clause 6.2 and they are consistent with other approvals granted in the Beacon Hill area.

- (1) The objectives of this clause are as follows—
 - (a) to avoid significant adverse impacts on development and on properties in the vicinity of development sites resulting from landslides originating either on or near sloping land,
 - (b) to ensure the impacts of storm water runoff from development on or near sloping land are minimised so as to not adversely affect the stability of the subject and surrounding land,
 - (c) to ensure subsurface flows are not adversely affected by development so as to not impact on the stability of existing or adjoining land.
- (2) This clause applies to land shown as Area A, Area B, Area C, Area D and Area E on the <u>Landslip</u> Risk Map.
- (3) Development consent must not be granted to development on land to which this clause applies unless the consent authority is satisfied that—
 - (a) the application for development has been assessed for the risk associated with landslides in relation to both property and life, and
 - (b) the development will not cause significant detrimental impacts because of stormwater discharge from the development site, and
 - (c) the development will not impact on or affect the existing subsurface flow conditions.

Comment:

The site is located within Area B of the Landslip Risk map. The development application is supported by a geotechnical assessment. Refer to the Geotechnical Assessment report prepared by Ascent Geo for full assessment of the proposed development. The conclusions of the report are provided below:

3.7 Conclusion and Recommendations

The proposed development is considered to be suitable for the site. The existing conditions and proposed development are considered to constitute an 'ACCEPTABLE' risk to life and a 'LOW' risk to property provided that the recommendations outlined in Table 6 are adhered to during design and construction.

General

The site is not identified on the following maps within WLEP2011:

- Bushfire Map
- Land Reservation Acquisition Map
- Heritage Map
- Coastline Hazard Map
- Key Sites Map
- Additional Permitted Uses Map
- Land Reclassification (Part Lots) Map
- Floor Space Ratio Map
- Centres Map
- Acid Sulfate Soils Map
- Flood Hazard Map

4.4 Warringah Development Control Plan (WDCP)

In designing the proposed changes to the built form, due consideration has been given to the respective sections and objectives of WDCP, in particular:

- Part B Built Form Controls
- Part C Siting Factors
- Part D Design
- Part E Natural Environment

Key components of the DCP have been detailed below. The proposal is compliant with relevant provisions of the WDCP.

Warringah Development Control Plan			
	Requirement	Proposed	
Wall Height	7.2m	Merit assessment.	
Side	5m then 45 degrees from a height above	Merit assessment.	
Boundary	ground level (existing) at the side boundaries		
Envelope			
Front	6.5m	Merit assessment.	
Setback			
		2 "	
Side	0.9m	Complies.	
Setbacks			
Rear	6m	Complies.	
Setback			
Landscaping	154.08sqm (40%)	Merit assessment.	
Private A dwelling house with 3 or more bedrooms		Merit Assessment.	
Open Space	will require 60sqm of private open space area		
Access to	At least 50% of the required area of private	Complies – refer to shadow diagrams	
Sunlight	open space of each dwelling and at least 50%	provided within the architectural	
	of the required area of private open space of	package.	
	adjoining dwellings are to receive a minimum		
	of 3 hours of sunlight between 9am and 3pm		
	on June 21		

Part A - Introduction

A.5 Objectives

The overriding objective of the DCP is to create and maintain a high level of environmental quality throughout Warringah. Development should result in an increased level of local amenity and environmental sustainability. The other objectives of this plan are:

Objectives

- To ensure development responds to the characteristics of the site and the qualities of the surrounding neighbourhood
- To ensure new development is a good neighbour, creates a unified landscape, contributes to the street, reinforces the importance of pedestrian areas and creates an attractive design outcome
- To inspire design innovation for residential, commercial and industrial development
- To provide a high level of access to and within development.
- To protect environmentally sensitive areas from overdevelopment or visually intrusive development

so that scenic qualities, as well as the biological and ecological values of those areas, are maintained
• To achieve environmentally, economically and socially sustainable development for the community of Warringah

Comments:

Complies – the proposal is for the alterations and additions to the existing dwelling house, the construction of a swimming pool, detached carport and associated works. The proposed development is compatible with existing residential developments along Crawford Place noting the existing bulk and scale. The development has been strategically designed with minimal amenity impacts on neighbouring properties.

Part B - Built Form Controls

B1 Wall Heights

Objectives

- To minimise the visual impact of development when viewed from adjoining properties, streets, waterways and land zoned for public recreation purposes.
- To ensure development is generally beneath the existing <u>tree</u> canopy level.
- To provide a reasonable sharing of views to and from public and private properties.
- To minimise the impact of development on adjoining or nearby properties.
- To ensure that development responds to site topography and to discourage excavation of the natural landform.
- To provide sufficient scope for innovative roof pitch and variation in roof design.

Requirements

1. Walls are not to exceed 7.2 metres from ground level (existing) to the underside of the ceiling on the uppermost floor of the building (excluding habitable areas wholly located within a roof space).

Exceptions

This control may be varied on sites with slopes greater than 20% within the building footprint (measured at the base of the external walls), provided the building:

- does not exceed the 8.5 metre height development standard;
- is designed and located to minimise bulk and scale; and
- has a minimal visual impact when viewed from the downslope sides of the land.

Comments:

Merit assessment – the site is subject to a maximum wall height of 7.2m; the proposal has been designed with the following wall heights:

East elevation: 8.17m to 8.36m

West elevation: 6.48m to 7.26m

The proposal has been designed as alterations and additions to the existing dwelling house. It is noted that the proposed minor non-compliances are influenced by the topography of the site (cross fall side to side) and the existing man-made level changes. The site slopes approximately 3.5m across the site from the north-western corner to the south-eastern corner of the allotment. It is our professional opinion that the proposal is not of an offensive bulk and scale that would look out of

character of the southern side of Crawford Place, in particular noting that the major variation on the eastern façade is setback 3.77m-4.485m from the side boundary.

Noting that the proposal will not adversely impact adjoining properties, the variation can be supported, in this instance. In this regard, it is important to note the EPA Act Cl4.15(3A)(b) which states that flexibility should be applied where reasonable alternative solutions that achieve the objects of those standards. In this regard, the proposal is consistent with the streetscape of Crawford Place and therefore warrants approval, as submitted.

B3 Side Boundary Envelope

Objectives

- To ensure that development does not become visually dominant by virtue of its height and bulk.
- To ensure adequate light, solar access and privacy by providing spatial separation between buildings.
- To ensure that development responds to the topography of the site.

Requirements

- 1. Buildings on land shown coloured on the DCP Map Side Boundary Envelopes must be sited within a building envelope determined by projecting planes at 45 degrees from a height above ground level (existing) at the side boundaries of:
- 4 metres, or
- 5 metres

as identified on the map.

2. On land within the R3 Medium Density Residential zone, above and below ground structures and private open space, carparking, vehicle access ramps, balconies, terraces, and the like shall not encroach the side boundary envelope.

Exceptions

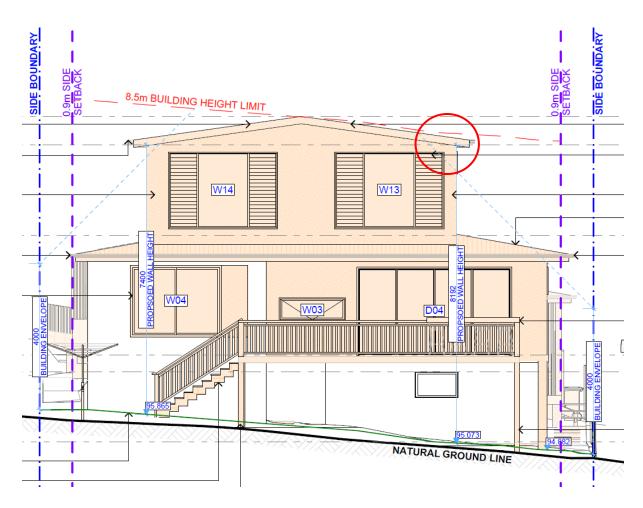

Land Zoned R2 or E4 or Zoned RU4 with frontage to The Greenway

For all land zoned R2 or E4, or land zoned RU4 with frontage to "The Greenway", Duffy's Forest:

- Fascias, gutters, downpipes, eaves (up to 0.675 metres from the boundary), masonry chimneys, flues, pipes or other services infrastructure may encroach beyond the side boundary envelope.
- Consent may be granted for the addition of a second storey to an existing dwelling house that to a minor extent does not comply with the requirement of this control.

Comments:

Merit assessment – the proposal has been strategically designed with near full compliance for the side boundary envelope control noting that eaves may encroach beyond the envelope up to 0.675m from the boundary. The minor variation relates to the rear eastern portion of the dwelling, which results in a 0.73m variation requirement:

The proposal has been designed with large side setbacks to the first-floor addition and is consistent with the desired future character, bulk and scale and appearance of Crawford Place. The minor variation will have no adverse impacts to the adjoining neighbours and a variation in this instance can be supported.

B5 Side Boundary Setbacks

Objectives

- To provide opportunities for deep soil landscape areas.
- To ensure that development does not become visually dominant.
- To ensure that the scale and bulk of buildings is minimised.
- To provide adequate separation between buildings to ensure a reasonable level of privacy, amenity and solar access is maintained.
- To provide reasonable sharing of views to and from public and private properties.

Requirements

- 1. Development on land shown coloured on the DCP Map Side Boundary Setbacks is to maintain a minimum setback from side boundaries as shown on the map.
- 2. Side boundary setback areas are to be landscaped and free of any above or below ground structures, car parking or site facilities other than driveways and fences.
- 3. On land within the R3 Medium Density Residential zone, above and below ground structures and private open space, basement car parking, vehicle access ramps, balconies, terraces, and the like shall not encroach the side setback except as provided for under Exceptions below.

Exceptions

Land Zoned R2

All development:

Screens or sunblinds, light fittings, electricity or gas meters, or other services infrastructure
and structures not more than 1 metre above ground level (existing) such as unroofed
terraces, balconies, landings, steps or ramps may encroach beyond the minimum side
setback

Ancillary to a dwelling house:

• Consent may be granted to allow a single storey outbuilding, carport, pergola or the like that to a minor extent does not comply with the requirements of this clause

Comments:

Complies – the development is compliant with the prescribed side boundary setback controls for the dwelling house.

B7 Front Boundary Setbacks

Objectives

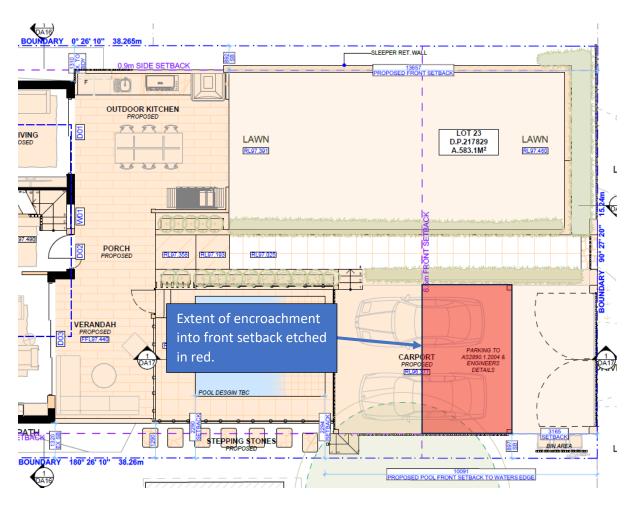

- To create a sense of openness.
- To maintain the visual continuity and pattern of buildings and landscape elements.
- To protect and enhance the visual quality of streetscapes and public spaces.
- To achieve reasonable view sharing.

Requirements

- 1. Development is to maintain a minimum setback to road frontages.
- 2. The <u>front boundary setback</u> area is to be landscaped and generally free of any structures, basements, carparking or site facilities other than driveways, letter boxes, <u>garbage</u> storage areas and fences.
- 3. Where primary and secondary setbacks are specified, buildings and structures (such as carparks) are not to occupy more than 50% of the area between the primary and secondary setbacks. The area between the primary setback and the road boundary is only to be used for landscaping and driveways.
- 4. For land zoned E3 and not having frontage to Kamber Road or Kimbriki Road the minimum front building setback area is to be densely landscaped using locally occurring species of canopy trees and shrubs and free of any structures, carparking or site facilities other than driveways, letterboxes and fences.

Comments:

Merit assessment – the proposal includes provisions for a carport structure forward of the front building line extending 3.33m within of the prescribed 6.5m front setback, as shown in the figure below. In our professional opinion the encroachment will have no detrimental impacts to the streetscape maintaining the visual pattern of development along the street.

The proposal is not out of context and will fit in with the existing streetscape noting the inconsistent prevailing building line on the southern side of Crawford Place, with existing parking structures in the street forward of the front building line. It is important to acknowledge that the bulk and scale of the proposed carport is minimal, noting the building materials and landscaping proposed to blend it in with the natural elements of the site. In our professional opinion, the proposal is the most reasonable option on the site that avoids the need for extensive excavation. The carport alignment is not only consistent with the streetscape but is also the preferred environmental option for the site resulting in the least amount of disturbance to the site with parking and access complying with relevant Australian Standards.

B9 Rear Boundary Setbacks

Objectives

- To ensure opportunities for deep soil landscape areas are maintained.
- To create a sense of openness in rear yards.
- To preserve the amenity of adjacent land, particularly relating to privacy between buildings.
- To maintain the existing visual continuity and pattern of buildings, rear gardens and landscape elements.
- To provide opportunities to maintain privacy between dwellings.

Requirements

- 1. Development is to maintain a minimum setback to rear boundaries.
- 2. The rear setback area is to be landscaped and free of any above or below ground structures.

- 3. On land zoned R3 Medium Density where there is a 6m rear boundary setback, above and below ground structures and private open space, including basement carparking, vehicle access ramps, balconies, terraces, and the like shall not encroach the rear building setback.
- 4. The rear building setback for land zoned IN2 Light Industrial at Tepko Road that adjoins land zoned R2 Low Density Residential is not to be used for industrial purposes or vehicle access.
- 5. The rear building setback for land zoned IN2 Light Industrial in the vicinity of Campbell Parade, Manly Vale is not to be used for industrial purposes or vehicle access

Exceptions

Land Zoned R2 and Land Zoned RU4 with frontage to The Greenway

On land zoned R2 Low Density Residential, and land zoned RU4 Rural Small Holdings that has frontage to "The Greenway", Duffy's Forest, where the minimum rear building setback is 6 metres, exempt development, swimming pools and outbuildings that, in total, do not exceed 50% of the rear setback area, provided that the objectives of this provision are met.

Comments:

Complies – the proposal complies with the 6m rear setback control.

Part C - Siting Factors

C2 Traffic, Access and Safety

Objectives

To minimise:

- a) traffic hazards;
- b) vehicles queuing on public roads
- c) the number of vehicle crossings in a street;
- d) traffic, pedestrian and cyclist conflict;
- e) interference with public transport facilities; and
- f) the loss of "on street" kerbside parking.

Requirements

Vehicular Access

- 1. Applicants shall demonstrate that the location of vehicular and pedestrian access meets the objectives.
- 2. Vehicle access is to be obtained from minor streets and lanes where available and practical.
- 3. There will be no direct vehicle access to properties in the B7 zone from Mona Vale Road or Forest Way.
- 4. Vehicle crossing approvals on public roads are to be in accordance with Council's Vehicle Crossing Policy (Special Crossings) LAP-PL413 and Vehicle Access to Roadside Development LAP-PL 315.
- 5. Vehicle crossing construction and design is to be in accordance with Council's Minor works specification.

On-site loading and unloading

6. Facilities for the loading and unloading of service, delivery and emergency vehicles are to be: appropriate to the size and nature of the development;

screened from public view; and

designed so that vehicles may enter and leave in a forward direction.

Exceptions

Reference should be made to Part G for additional, site specific requirements

Comments:

Complies – the proposal retains the intent of the existing vehicular access to the site with a new and revised widened crossover and driveway adjacent to the eastern boundary to facilitate safe and efficient vehicular access to the site in accordance with relevant Australian standards. Refer to architectural plans prepared by Action Plans Pty Ltd for further details. The proposal complies with the objectives and requirements of control C2 and can be supported by Council as submitted.

C3 Parking Facilities

Objectives

- To provide adequate off street carparking.
- To site and design parking facilities (including garages) to have minimal visual impact on the street frontage or other public place.
- To ensure that parking facilities (including garages) are designed so as not to dominate the street frontage or other public spaces.

Requirements

- 1. The following design principles shall be met:
- Garage doors and carports are to be integrated into the house design and to not dominate the façade. Parking is to be located within buildings or on site.;
- Laneways are to be used to provide rear access to carparking areas where possible;
- Carparking is to be provided partly or fully underground for apartment buildings and other large scale developments;
- Parking is to be located so that views of the street from front windows are not obscured; and
- Where garages and carports face the street, ensure that the garage or carport opening does not exceed 6 metres or 50% of the building width, whichever is the lesser.
- 2. Off street parking is to be provided within the property demonstrating that the following matters have been taken into account:
- the land use;
- the hours of operation;
- the availability of public transport;
- the availability of alternative car parking; and
- the need for parking facilities for courier vehicles, delivery / service vehicles and bicycles.
- 3. Carparking, other than for individual dwellings, shall:
- Avoid the use of mechanical car stacking spaces;
- Not be readily apparent from public spaces;
- Provide safe and convenient pedestrian and traffic movement;
- Include adequate provision for manoeuvring and convenient access to individual spaces;
- Enable vehicles to enter and leave the site in a forward direction;
- Incorporate unobstructed access to visitor parking spaces;
- Be landscaped to shade parked vehicles, screen them from public view, assist in micro-climate management and create attractive and pleasant places;
- Provide on site detention of stormwater, where appropriate; and
- Minimum car parking dimensions are to be in accordance with AS/NZS 2890.1.
- 4. Carparking is to be provided in accordance with Appendix 1 which details the rate of car parking for various land uses. Where the carparking rate is not specified in Appendix 1 or the WLEP, carparking must be adequate for the development having regard to the objectives and requirements of this clause. The rates specified in the Roads and Traffic Authority's Guide to Traffic Generating Development should be used as a guide where relevant.
- 5. Adequate provision for staff, customer and courier parking, and parking and turning of vehicles with trailers must be provided if appropriate to the land use.

- 6. For bulky goods premises adequate on-site parking spaces for service/delivery vehicles at a convenient location, separated from customer parking must be provided.
- 7. Where appropriate, car parking which meets the needs of people with physical disabilities must be provided in accordance with the relevant Australian Standard.
- 8. For Forest Way Village car parking at ground level is to be provided for individual units.

Exceptions

Reference should be made to Part G for additional, site specific requirements.

Community title subdivisions are to include provision for one visitor parking space per five dwellings or part thereof. These spaces are to be located within the neighbourhood property lot. Cross reference is in appendix 1.

Comments:

Complies – the proposal includes provisions for a carport to accommodate parking for two (2) vehicles on-site.

C4 Stormwater

Objectives

- To protect and improve the ecological condition of Warringah's beaches, lagoons, waterways, wetlands and surrounding bushland;
- To minimise the <u>risk</u> to public health and safety;
- To reduce the <u>risk</u> to life and property from flooding;
- Integrate Water Sensitive Urban Design measures into the landscape and built form to maximise amenity.
- To manage and minimise stormwater overland flow, nuisance flooding and groundwater related damage to properties.
- To protect Council's stormwater drainage assets during development works and to ensure Council's drainage rights are not compromised.
- To minimise the quantity of stormwater runoff from new development on Council's drainage system.

Requirements

- 1. Stormwater runoff must not cause downstream flooding and must have minimal environmental impact on any receiving stormwater infrastructure, watercourse, stream, lagoon, lake and waterway or the like.
- 2. The stormwater drainage systems for all developments are to be designed, installed and maintained in accordance with Council's Water Management Policy.

Exceptions

• Refer to Council's Water Management Policy for exceptions.

Comments:

Complies – a stormwater management plan has been prepared in accordance with Northern Beaches Councils requirements by Harris Page & Associates Pty Ltd.

C5 Erosion and Sedimentation

Objectives

- To reduce the potential for soil erosion and adverse sedimentation impacts upon the environment.
- To prevent the migration of sediment off the site onto any waterway, drainage systems, public

reserves, road reserve, bushland or adjoining private lands.

• To prevent any reduction in water quality downstream of the development site.

Requirements

- 1. All developments which involve the disturbance of land must install and maintain erosion and sediment controls until the site is fully stabilised.
- 2. Any erosion and sedimentation is to be managed at the source.
- 3. Erosion, sediment and pollution controls including water discharge from the site must comply with Council's Water Management Policy.
- 4. An Erosion and Sediment Control Plan must be prepared in accordance with Landcom's Managing Urban Stormwater: Soil and Construction Manual (2004) for all development which involves the disturbance of up to 2500m2 of land.
- 5. Soil and Water Management Plan must be prepared in accordance with Landcom's Managing Urban Stormwater: Soil and Construction Manual (2004) for all development which involves the disturbance of more than 2500m2 of land.

Exceptions

Reference should be made to Part G for additional, site specific requirements.

Comments:

Complies – an Erosion and Sediment Plan has been prepared in accordance with Northern Beaches Councils requirements by Action Plans.

C6 Building over or adjacent to Constructed Council Drainage Easements

Objectives

To ensure that Council's drainage infrastructure is not damaged and that costs and liabilities are minimised when constructing, replacing, maintaining or obtaining emergency access to constructed public drainage systems located within private property

Comments:

Not applicable – the proposal does not build over or have any construction works near Council Drainage Easements.

C7 Excavation and Landfill

Objectives

- To ensure any land excavation or fill work will not have an adverse effect upon the visual and natural environment or adjoining and adjacent properties.
- To require that excavation and landfill does not create airborne pollution.
- To preserve the integrity of the physical environment.
- To maintain and enhance visual and scenic quality.

Requirements

- 1. All landfill must be clean and not contain any materials that are contaminated and must comply with the relevant legislation.
- 2. Excavation and landfill works must not result in any adverse impact on adjoining land.
- 3. Excavated and landfill areas shall be constructed to ensure the geological stability of the work.
- 4. Excavation and landfill shall not create siltation or pollution of waterways and drainage lines, or degrade or destroy the natural environment.
- 5. Rehabilitation and revegetation techniques shall be applied to the fill.

6. Where landfill is necessary, it is to be minimal and shall have no adverse effect on the visual and natural environment or adjoining and surrounding properties.

Comments:

Complies – the proposal includes minor excavation works. A Geotechnical Assessment is submitted with the Development Application prepared by Ascent Geo.

C8 Demolition and Construction

Objectives

- To manage demolition and construction sites so that there is no unreasonable impact on the surrounding amenity, pedestrian or road safety, or the natural environment.
- To promote improved project management by minimising demolition and construction <u>waste</u> and encouraging source separation, reuse and recycling of materials.
- To assist industry, commercial operators and site managers in planning their necessary <u>waste</u> management procedures through the preparation and lodgement of a <u>Waste</u> Management Plan
- To discourage illegal dumping.

Requirements

1. All development that is, or includes, demolition and/or construction, must comply with the appropriate sections of the <u>Waste</u> Management Guidelines and all relevant Development Applications must be accompanied by a <u>Waste Management Plan</u>.

Comments:

Complies – the proposal will be constructed in accordance with relevant Australian Standards and Conditions of Consent as per Councils Waste Management Guidelines and Plan. A Waste Management Plan is submitted with the development application.

C9 Waste Management

Objectives

- To facilitate sustainable <u>waste</u> management in a manner consistent with the principles of Ecologically Sustainable Development (ESD).
- To achieve <u>waste</u> avoidance, source separation and recycling of household and industrial/commercial <u>waste</u>.
- To design and locate <u>waste</u> storage and collection facilities which are convenient and easily accessible; safe; hygienic; of an adequate size, and with minimal <u>adverse impacts</u> on residents, surrounding neighbours, and pedestrian and vehicle movements.
- To ensure <u>waste</u> storage and collection facilities complement <u>waste</u> collection and management services, offered by Council and the private service providers and support on-going control for such standards and services.
- To minimise risks to health and safety associated with handling and disposal of <u>waste</u> and recycled material, and ensure optimum hygiene.
- To minimise any adverse environmental impacts associated with the storage and collection of <u>waste</u>.

Requirements

1. All development that is, or includes, demolition and/or construction, must comply with the appropriate sections of the <u>Waste</u> Management Guidelines and all relevant Development Applications must be accompanied by a Waste Management Plan.

Comments:

Complies – the proposal will adequately demolish and construct the proposed works as per Councils Waste Management Guidelines and Plan. A Waste Management Plan is submitted with the development application.

Part D - Design

D1 Landscaped Open Space and Bushland Setting

Objectives

- To enable planting to maintain and enhance the streetscape.
- To conserve and enhance indigenous vegetation, topographical features and habitat for wildlife.
- To provide for landscaped open space with dimensions that are sufficient to enable the establishment of low lying shrubs, medium high shrubs and canopy trees of a size and density to mitigate the height, bulk and scale of the building.
- To enhance privacy between buildings.
- To accommodate appropriate outdoor recreational opportunities that meet the needs of the occupants.
- To provide space for service functions, including clothes drying.
- To facilitate water management, including on-site detention and infiltration of stormwater.

Requirements

- 1. The required minimum area of landscaped open space is shown on DCP Map Landscaped Open Space and <u>Bushland</u> Setting. To measure the area of landscaped open space:
- a) Driveways, paved areas, roofed areas, tennis courts, car parking and stormwater structures, decks, etc, and any open space areas with a dimension of less than 2 metres are excluded from the calculation;
- b) The water surface of swimming pools and impervious surfaces which occur naturally such as rock outcrops are included in the calculation;
 - c) Landscaped open space must be at ground level (finished); and
 - d) The minimum soil depth of land that can be included as landscaped open space is 1 metre.
- 2. Where land is shown on DCP Map Landscaped Open Space and <u>Bushland</u> Setting as "<u>Bushland</u> Setting", a minimum of 50% of the site area must remain undisturbed by development and is to be kept as natural <u>bushland</u> or landscaped with locally indigenous species.
- 3. In Cottage Point the relationship of the locality with the surrounding National Park and Cowan <u>Creek</u> waterway will be given top priority by enhancing the spread of indigenous <u>tree</u> canopy and protecting the natural landscape including rock outcrops and remnant bushland.

Exceptions

Any conflicting requirements in Part G override this control

Comments:

Merit assessment – the site is subject to a 40% landscaped open space requirement (or 233.24sqm). The proposal has been designed with a total landscaped area of 207.56sqm (35.59%) which equates to a deficit of 25.68sqm or 11.01%. The proposal has been designed to be functional whilst also allowing landscaping to provide privacy to adjoining neighbours and the occupants of the proposed dwellings. It is our professional opinion that the proposed deficit in the required total landscaped area is minor, and the proposal is acceptable on merit and can be supported by Council as submitted.

D2 Private Open Space

Objectives

- To ensure that all residential development is provided with functional, well located areas of private open space.
- To ensure that private open space is integrated with, and directly accessible from, the living area of dwellings.
- To minimise any adverse impact of private open space on adjoining buildings and their associated private open spaces.
- To ensure that private open space receives sufficient solar access and privacy.

Requirements

- 1. Residential development is to include private open space for each dwelling.
- 2. The minimum area and dimensions of private open space are as follows:

DWELLING Type	Area and Minimum Dimensions per dwelling
Dwelling houses (including dual occupancy) and attached dwellings with 1	A total of 35m2 with minimum dimensions of 3 metres
or 2 bedrooms	
Dwelling houses (including dual occupancy) and attached dwellings with 3	A total of 60m2 with minimum dimensions of 5 metres
or more bedrooms	
Multi dwelling housing (not located at ground level); residential flat	A total of 10m2 with minimum dimensions of 2.5 metres
buildings and shop top housing	

- 3. Private open space is to be directly accessible from a living area of a dwelling and be capable of serving as an extension of the dwelling for relaxation, dining, entertainment, recreation and children's play.
- 4. Private open space is to be located and designed to ensure privacy of the occupants of adjacent buildings and occupants of the proposed development.
- 5. Private open space shall not be located in the primary front building setback.
- 6. Private open space is to be located to maximise solar access.

Comments:

Merit assessment – the proposal accommodates adequate private open space that is functional and usable, albeit within the front setback of the site. The siting of the existing dwelling house has a large front setback of 19.39m. The proposal has been sensitively designed as alterations and additions to predominantly retain the siting of the ground floor as existing. Given the unique nature of the site, it is our professional opinion that a variation to this requirement is acceptable in this instance noting that the front setback area offers most reasonable location to accommodate the proposed principal private open space areas on-site with generous and adequate space directly accessible off the proposed primary living rooms. The proposal is acceptable on merit and can be supported by Council as submitted.

D3 Noise

Objectives

- To encourage innovative design solutions to improve the urban environment.
- To ensure that noise emission does not unreasonably diminish the amenity of the area or result in noise intrusion which would be unreasonable for occupants, users or visitors.

Requirements

1. Noise from combined operation of all mechanical plant and equipment must not generate noise levels that exceed the ambient background noise by more than 5dB(A) when measured in accordance with the <u>NSW Industrial Noise Policy</u> at the receiving boundary of residential and other noise sensitive land uses.

See also NSW Industrial Noise Policy Appendices

- 2. Development near existing noise generating activities, such as industry and roads, is to be designed to mitigate the effect of that noise.
- 3. <u>Waste</u> collection and delivery vehicles are not to operate in the vicinity of residential uses between 10pm and 6am.
- 4. Where possible, locate noise sensitive rooms such as bedrooms and private open space away from noise sources. For example, locate kitchens or service areas closer to busy road frontages and bedrooms away from road frontages.
- 5. Where possible, locate noise sources away from the bedroom areas of adjoining dwellings/properties to minimise impact.

Comments:

Complies – the proposed development is for alterations and additions to the existing dwelling house. The use will remain as existing, and the proposed alterations and additions will not impact noise sensitive rooms through the design of the floor plan layout.

D4 Electromagnetic Radiation

Objectives

- To ensure the safety of the community from electromagnetic radiation.
- To ensure that mobile phone base station and associated infrastructure and equipment does not result in an adverse visual impact on the natural or built environment.

Requirements

Radiation levels from mobile phone base stations, antennas and transmitters which emit electromagnetic radiation are to comply with the following requirements:

<u>Telecommunications Act 1997</u>

Comments:

Not applicable.

D6 Access to Sunlight

Objectives

- To ensure that reasonable access to sunlight is maintained.
- To encourage innovative design solutions to improve the urban environment and public open space.
- To promote passive solar design and the use of solar energy.

Requirements

- 1. Development should avoid unreasonable overshadowing any public open space.
- 2. At least 50% of the required area of private open space of each dwelling and at least 50% of the required area of private open space of adjoining dwellings are to receive a minimum of 3 hours of sunlight between 9am and 3pm on June 21.

Exceptions

Council may consider a variation to this control in the particular circumstances of a proposal, where an applicant can demonstrate, to the satisfaction of Council that:

i) the slope or topography of the site or adjoining property makes compliance impractical; and

ii) other design options have been investigated which would comply but would unreasonably constrain the development of an otherwise compliant building.

Comments:

Complies – it is acknowledged that the proposal will provide some further shadowing to the adjoining neighbour to the east and west. The proposed shadowing is acceptable and reasonable as the adjoining properties will still retain a minimum of 3 hours of sunlight between 9am and 3pm on June 21 to living and private open space areas. It is our professional opinion that the proposal meets the objectives of control D6 and maintains reasonable access to sunlight to adjoining properties.

D7 Views

Objectives

- To allow for the reasonable sharing of views.
- To encourage innovative design solutions to improve the urban environment.
- To ensure existing canopy trees have priority over views.

Requirements

1. Development shall provide for the reasonable sharing of views.

Comments:

Complies – the proposal has been designed to allow for reasonable sharing of views between the site and adjoining properties. It is our professional opinion that an assessment of the principles of tenacity are not applicable for this assessment.

D8 Privacy

Objectives

- To ensure the siting and design of buildings provides a high level of visual and acoustic privacy for occupants and neighbours.
- To encourage innovative design solutions to improve the urban environment.
- To provide personal and property security for occupants and visitors.

Requirements

- 1. Building layout should be designed to optimise privacy for occupants of the development and occupants of adjoining properties.
- 2. Orientate living areas, habitable rooms and windows to private open space areas or to the street to limit overlooking.
- 3. The effective location of doors, windows and balconies to avoid overlooking is preferred to the use of screening devices, high sills or obscured glass.
- 4. The windows of one dwelling are to be located so they do not provide direct or close views (ie from less than 9 metres away) into the windows of other dwellings.
- 5. Planter boxes, louvre screens, pergolas, balcony design and the like are to be used to screen a minimum of 50% of the principal private open space of a lower apartment from overlooking from an upper apartment.

Comments:

Complies – the proposed development has been strategically designed to ensure that there will be no adverse overlooking impacts from the proposed dwelling house to any adjoining properties. The development provides compliant side boundary setbacks to adequately separate the building from adjoining properties to ensure a reasonable level of privacy is maintained. All proposed first-floor windows with aspects east and west either correspond with low-use rooms, are screened or high-sill

at adequate heights to prevent overlooking. The proposed new swimming pool whilst for the majority built out of the ground has been designed to ensure concourse areas are non-trafficable in key parts that may overlook the neighbouring property to the east at no. 7 Crawford Place. The north-facing ground floor porch/verandah and the south-facing deck have both been designed with compliant side setbacks and with suitable privacy screening to prevent direct overlooking opportunities to the adjoining properties to the east and west. The proposal has been designed to maintain adequate landscaping which further enhances privacy while maintaining adequate sunlight. The proposal in my opinion will have minimal to no adverse impact on adjoining properties.

D9 Building Bulk

Objectives

- To encourage good design and innovative architecture to improve the urban environment.
- To minimise the visual impact of development when viewed from adjoining properties, streets, waterways and land zoned for public recreation purposes.

Requirements

- 1. Side and rear setbacks are to be progressively increased as wall height increases.
- 2. Large areas of continuous wall planes are to be avoided by varying building setbacks and using appropriate techniques to provide visual relief.
- 3. On sloping land, the height and bulk of development (particularly on the downhill side) is to be minimised, and the need for cut and fill reduced by designs which minimise the building footprint and allow the building mass to step down the slope. In particular:

The amount of fill is not to exceed one metre in depth.

Fill is not to spread beyond the footprint of the building.

Excavation of the landform is to be minimised.

- 4. Building height and scale needs to relate to topography and site conditions.
- 5. Orientate development to address the street.
- 6. Use colour, materials and surface treatment to reduce building bulk.
- 7. Landscape plantings are to be provided to reduce the visual bulk of new building and works.
- 8. Articulate walls to reduce building mass.

Comments:

Complies – the proposed development does not result in unacceptable bulk and scale impacts. The proposed alterations and additions to the dwelling house have been designed as per modern developments along Crawford Place. The proposal has been designed with regard to the existing streetscape of Crawford Place noting the existing front setbacks, building heights and single to two storey built form. As per the requirements, the proposal complies as follows:

- The site is constrained by the topography of the land. The project designer has created a dwelling which is consistent with the streetscape.
- The building height and scale meets the needs of the topography and the existing streetscape.
- The project designer has utilised colours and materials which assist to reduce the bulk and scale and create a sense of openness.

It is our professional opinion that the proposal meets the relevant objectives and is consistent with the bulk and scale of Crawford Place.

D10 Building Colours and Materials

Objectives

• To ensure the colours and materials of new or altered buildings and structures are sympathetic to the surrounding natural and built environment.

Requirements

- 1. In highly visible areas, the visual impact of new development (including any structures required to retain land) is to be minimized through the use of appropriate colours and materials and landscaping.
- 2. The colours and materials of development on sites adjoining, or in close proximity to, <u>bushland</u> areas, waterways or the beach must blend in to the natural landscape.
- 3. The colours and materials used for <u>alterations and additions</u> to an existing structure shall complement the existing external building façade.
- 4. The holiday/fisherman shack character of the waterfront of Cottage Point is to be enhanced by the use of building materials which are sympathetic to the small timber and fibro cottages currently in existence on the waterfront. All buildings visible from the water are to utilise materials such as weatherboard, fibre cement, corrugated steel and timber. The use of masonry is discouraged.

Comments:

Complies – the architectural plans prepared by Action Plans Pty Ltd drawing DA22 provides a material and details schedule. The proposal has been designed with modern building materials and colours which are sympathetic to the surrounding natural and built environment. The proposal complies with the objectives of D10 Building Colours and Materials.

D11 Roofs

Objectives

- To encourage innovative design solutions to improve the urban environment.
- Roofs are to be designed to complement the local skyline.
- Roofs are to be designed to conceal plant and equipment.

Requirements

- 1. Lift overruns, plant and other mechanical equipment are not to detract from the appearance of roofs.
- 2. Roofs should complement the roof pitch and forms of the existing buildings in the streetscape.
- 3. Articulate the roof with elements such as dormers, gables, balconies, verandahs and pergolas.
- 4. Roofs shall incorporate eaves for shading.
- 5. Roofing materials should not cause excessive glare and reflection.
- 6. Service equipment, lift overruns, plant and other mechanical equipment on the roof shall be minimised by integrating as many services, etc as possible into the building.

Comments:

Complies – the proposed roof has been designed as a new modern contemporary roof as per other approvals granted in the immediate area.

D12 Glare and Reflection

Objectives

- To ensure that development will not result in overspill or glare from artificial illumination or sun reflection.
- To maintain and improve the amenity of public and private land.
- To encourage innovative design solutions to improve the urban environment.

Requirements

- 1. The overspill from artificial illumination or sun reflection is to be minimised by utilising one or more of the following: Selecting an appropriate lighting height that is practical and responds to the building and its neighbours;
 - Minimising the lit area of signage;
 - Locating the light source away from adjoining properties or boundaries; and
 - Directing light spill within the site.
- 2. Any glare from artificial illumination is to be minimised by utilising one or more of the following:
 - Indirect lighting;
 - Controlling the level of illumination; and
 - Directing the light source away from view lines.
- 3. Sunlight reflectivity that may impact on surrounding properties is to be minimised by utilising one or more of the following:
- Selecting materials for roofing, wall claddings and glazing that have less reflection eg medium to dark roof tones;
 - Orienting reflective materials away from properties that may be impacted;
 - Recessing glass into the façade;
 - Utilising shading devices;
- Limiting the use of glazing on walls and glazed balustrades and avoiding the use of highly reflective glass; and
- Selecting windows and openings that have a vertical emphasis and are significantly less in proportion to solid massing in walls.

Comments:

Complies – the development does not propose materials that will result in an unacceptable amount of glare. The proposal meets the relevant objectives of D12 Glare and Reflection.

D13 Front Fences and Front Walls

Objectives

- To ensure that fencing, terracing and retaining walls are compatible with the existing streetscape character while creating visual interest in the public domain.
- To encourage innovative design solutions to improve the urban environment.
- To avoid a 'walled in' streetscape.

Requirements

- 1. Fences, including side fences, located within the street setback area are to be compatible with the existing streetscape character.
- 2. Where a solid fence is required it is to be articulated to provide visual interest and set back to allow for landscaping to soften and screen the appearance of the fence.
- 3. Fences located within the front building setback area are to complement the existing streetscape character.
- 4. Fences are to be constructed to allow casual surveillance, except where there is excessive noise.

- 5. Gates are not to encroach over the property boundary when opening or closing.
- 6. Fences should complement the architectural period of the building.

Exceptions

No solid front fences or front walls will be permitted on <u>flood prone land</u>. Reference should be made to Part G Belrose Corridor for site specific requirements.

Comments:

Complies – the proposal includes provisions for a new front boundary fence. The fence has been designed to be compliant with councils' requirements incorporating an open style design and reduced scale to maintain casual surveillance opportunities to Crawford Place. The front fence design is sympathetic to the streetscape character and complementary with the proposed building.

D14 Site Facilities

Objectives

- To provide for the logical placement of facilities on site that will result in minimal impacts for all users, particularly residents, and surrounding neighbours.
- To encourage innovative design solutions to improve the urban environment.
- To make servicing the site as efficient and easy as possible.
- To allow for discreet and easily serviceable placement of site facilities in new development.

Requirements

- 1. Site facilities including <u>garbage</u> and recycling enclosures, mail boxes and clothes drying facilities are to be adequate and convenient for users and services and are to have minimal visual impact from public places. In particular:
- <u>Waste</u> and recycling bin enclosures are to be durable, integrated with the building design and site landscaping, suitably screened from public places or streets and located for convenient access for collection;
- All dwellings which are required to have landscaped open space are to be provided with adequate open air clothes drying facilities which are suitably screened from public places or streets;
- <u>Garbage</u> areas are to be designed to avoid common problems such as smell, noise from collection vehicles and the visibility of containers;
- Landscaping is to be provided to reduce the impact of all <u>garbage</u> and recycling enclosures. They are to be located away from habitable rooms, bedrooms or living areas that may detract form the amenity of occupants; and
- Mail boxes are to be incorporated into the front fence or landscaping design. They are to be easily accessible and clearly identifiable.

Comments:

Complies – the site has been designed with relevant facilities including a waste enclosure, space for clothesline in the rear yard and a mailbox as required.

D15 Side and Rear Fences

Objectives

• To encourage innovative design solutions to improve the urban environment.

Requirements

1. Generally, side and rear boundary fences are to be no higher than 1.8 metres on level sites, or 1.8 metres measured from the low side where there is a difference in either side of the boundary.

- 2. For sloping sites, the height of fences may be averaged and fences and walls may be regularly stepped.
- 3. All fencing materials are to complement the existing neighbourhood. The use of corrugated metal, barbed wire or broken glass is not permitted.

Complies – the proposal in majority will retain the existing side and rear fences. New fencing may be installed under the exempt development allowances.

D16 Swimming Pools and Spa Pools

Objectives

- To ensure swimming pools and spas are located to preserve the natural environment, streetscape and residential amenity.
- To encourage innovative design solutions to improve the urban environment.

Requirements

- 1. Pools are not to be located in the front building setback.
- 2. Where there are 2 frontages, swimming pools and spas are not to be situated in the primary street frontage.
- 3. Swimming pools and spas are to be setback from any trees. Australian Standard AS4970-2009 Protection of trees on development sites is to be used to determine an appropriate setback.

Comments:

Merit assessment – the proposal includes a new swimming pool located within the front setback. The pool will have no adverse impact on the natural environment, streetscape or on residential amenity noting the pool will largely not be visible from the streetscape with the provision of appropriate plantings/landscaping, and with the extent of the proposed carport structure and front fence providing suitable privacy measures. Given the unique nature of the site with the siting of the existing dwelling house setback 19.39m from the front boundary, it is our professional opinion that a variation to this requirement is acceptable in this instance noting that the front setback area offers the most reasonable location to accommodate the proposed principal private open space areas on-site with generous and adequate space directly accessible off the proposed primary living rooms with north facing aspects for access to sunlight. The location of the proposed swimming pool is acceptable on merit and can be supported by Council as submitted.

D17 Tennis Courts

Objectives

• To encourage innovative design solutions to improve the urban environment.

Requirements

- 1. Tennis courts are to be located behind the front building setback.
- 2. Where there are 2 frontages, the location of the tennis court is not to be in the primary street frontage.
- 3. Tennis courts are to be setback from any trees. Australian Standard AS4970-2009 Protection of trees on development sites is to be used to determine an appropriate setback.
- 4. The height and location of court fencing is to enable:
 - a) Sharing of views from surrounding residences; and
 - b) Provision of sunlight to surrounding properties.

- 5. Fencing material is to be a dark colour.
- 6. Fences are to be setback a minimum of 1.5 metres from front, side and rear boundaries.

Not applicable – the proposal does not include a tennis court.

D18 Accessibility and Adaptability

Objectives

- To ensure vehicular access points for parking, servicing or deliveries, and pedestrian access are designed to provide vehicular and pedestrian safety.
- To ensure convenient, comfortable and safe access for all people including older people, people with prams and strollers and people with a disability.
- To provide a reasonable proportion of residential units that should be designed to be adaptable and easily modified to promote 'ageing in place' and for people with disabilities.

Comments:

Not applicable.

D19 Site Consolidation in the R3 and IN1 Zone

Objectives

- To encourage lot consolidation to allow efficient use of land.
- To encourage innovative design solutions to improve the urban environment.
- To avoid lot sterilization.

Comments:

Not applicable.

D20 Safety and Security

Objectives

• To ensure that development maintains and enhances the security and safety of the community.

Requirements

- 1. Buildings are to overlook streets as well as public and communal places to allow casual surveillance.
- 2. Service areas and access ways are to be either secured or designed to allow casual surveillance.
- 3. There is to be adequate lighting of entrances and pedestrian areas.
- 4. After hours land use activities are to be given priority along primary pedestrian routes to increase safety.
- 5. Entrances to buildings are to be from public streets wherever possible.
- 6. For larger developments, a site management plan and formal <u>risk</u> assessment, including the consideration of the 'Crime Prevention through Environmental Design' principles may be required. This is relevant where, in Council's opinion, the proposed development would present a crime, safety or security <u>risk</u>. See <u>Crime Prevention and Assessment of Development Applications Guidelines under Section 79C of the Environmental Planning and Assessment Act 1979 prepared by the Department of Urban Affairs and Planning (now Department of Planning).</u>
- 7. Buildings are to be designed to allow casual surveillance of the street, for example by:
 a) Maximising the glazed shop front on the ground level so that views in and out of the shop can be achieved;

- b) Providing openings of an adequate size in the upper levels to maximise opportunities for surveillance;
 - c) Locating high use rooms to maximise casual surveillance;
 - d) Clearly displaying the street number on the front of the building in pedestrian view; and
 - e) Ensuring shop fronts are not obscured by planting, signage, awnings and roller shutters.
- 8. Casual surveillance of loading areas is to be improved by:
- a) Providing side and rear openings from adjacent buildings that overlook service areas and clear sight lines; and
 - b) Providing adequate day and night lighting which will reduce the <u>risk</u> of undesirable activity.
- 9. Design entrances to buildings from public streets so that:
 - a) Building entrances are clearly identifiable, defined, lit and visible;
- b) The residential component of a shop top housing development has a separate secure pedestrian entrance from the commercial component of the development;
 - c) Main entrances are clearly identifiable;
 - d) Pavement surfaces and signage direct pedestrian movements; and
 - e) Potential conflict between pedestrians and vehicles is avoided.

Exceptions

Reference should be made to Part G4 Warringah Mall for site specific requirements.

Comments:

Complies – the proposed alterations and additions have been sensitively designed to provide and maintain adequate casual surveillance opportunities facing Crawford Place to allow for passive surveillance of the street. The proposal meets the relevant objectives of D20 Safety and Security.

D21 Provision and Location of Utility Services

Objectives

- To encourage innovative design solutions to improve the urban environment.
- To ensure that adequate <u>utility services</u> are provided to land being developed.

Requirements

- 1. If a proposed development will involve a need for them, <u>utility services</u> must be provided, including provision of the supply of water, gas, telecommunications and electricity and the satisfactory management of sewage and drainage.
- 2. Service structures, plant and equipment are to be located below ground or be designed to be an integral part of the development and suitably screened from public places or streets.
- 3. Where possible, underground <u>utility services</u> such as water, gas, telecommunications, electricity and gas are to be provided in a common trench. The main advantages for this are:
 - a) A reduction in the number of trenches required;
 - b) An accurate location of services for maintenance;
 - c) Minimising the conflict between services;
 - d) Minimising land required and cost;
- 4. The location of <u>utility services</u> should take account of and minimise any impact on natural features such as <u>bushland</u> and natural watercourses.
- 5. Where natural features are disturbed the soil profile should be restored and landscaping and <u>tree</u> planting should be sited and selected to minimise impact on services, including existing overhead cables.
- 6. Where utilities are located above ground, screening devices should include materials that complement the streetscape, for example fencing and landscaping. The location of service structures such as electricity substations should be within the site area.

- 7. Habitable buildings must be connected to Sydney Water's sewerage system where the density is one dwelling per 1050 square metres or greater.
- 8. On land where the density is less than one dwelling per 1050 square metres, and where connection to Sydney Water is not possible, Council may consider the on-site disposal of effluent where the applicant can demonstrate that the proposed sewerage systems or works are able to operate over the long term without causing unreasonable adverse effects.

Complies – the site is adequately serviced by the essential utilities (i.e. water, electricity, sewer).

D22 Conservation of Energy and Water

Objectives

- To encourage innovative design solutions to improve the urban environment.
- To ensure energy and water use is minimised.

Requirements

- 1. The orientation, layout and landscaping of sites is to make the best use of natural ventilation, daylight and solar energy.
- 2. Site layout and structures are to allow for reasonable solar access for the purposes of water heating and electricity generation and maintain reasonable solar access to adjoining properties.
- 3. Buildings are to be designed to minimize energy and water consumption.
- 4. Landscape design is to assist in the conservation of energy and water.
- 5. Reuse of stormwater for on-site irrigation and domestic use is to be encouraged, subject to consideration of public health risks.
- 6. All development must comply with Council's Water Management Policy.

Comments:

Complies – the proposal is supported by a BASIX certificate.

D23 Signs

Objectives

- To encourage well designed and suitably located signs that allow for the identification of a land use, business or activity to which the sign relates.
- To achieve well designed and coordinated signage that uses high quality materials.
- To ensure that signs do not result in an adverse visual impact on the streetscape or the surrounding locality.
- To ensure the provision of signs does not adversely impact on the amenity of residential properties.
- To protect open space areas and heritage items or conservation areas from the <u>adverse impacts</u> of inappropriate signage.

Comments:

Not applicable.

Part E – The Natural Environment

E1 Preservation of Trees or Bushland Vegetation

Objectives

- To protect and enhance the urban forest of the Northern Beaches.
- To effectively manage the risks that come with an established urban forest through professional management of trees.
- To minimise soil erosion and to improve air quality, water quality, carbon sequestration, storm water retention, energy conservation and noise reduction.
- To protect, enhance <u>bushland</u> that provides habitat for locally native plant and animal species, threatened species populations and endangered ecological communities.
- To promote the retention and planting of trees which will help enable plant and animal communities to survive in the long-term.
- To protect and enhance the scenic value and character that trees and/or bushland vegetation provide.

Comments:

Complies – the development does not propose to remove any native vegetation.

E2 Prescribed Vegetation

Objectives

- To preserve and enhance the area's amenity, whilst protecting human life and property.
- To improve air quality, prevent soil erosion, assist in improving water quality, carbon sequestration, storm water retention, energy conservation and noise reduction.
- To provide habitat for local wildlife, generate shade for residents and provide psychological & social benefits.
- To protect and promote the recovery of threatened species, populations and endangered ecological communities.
- To protect and enhance the habitat of plants, animals and vegetation communities with high conservation significance.
- To retain and enhance native vegetation communities and the ecological functions of wildlife corridors.
- To reconstruct habitat in non vegetated areas of wildlife corridors that will sustain the ecological functions of a <u>wildlife corridor</u> and that, as far as possible, represents the combination of plant species and vegetation structure of the original 1750 community.
- Promote the retention of native vegetation in parcels of a size, condition and configuration which will as far as possible enable plant and animal communities to survive in the long-term.

Requirements

- 1. The following is prescribed for the purposes of clause 5.9(2) of Part 2 of the Vegetation SEPP: All native vegetation identified on:
- a) DCP Map Threatened and <u>High Conservation Habitat</u>
- b) DCP Map Wildlife Corridors
- c) DCP Map Native Vegetation
- d) known or potential habitat for threatened species, populations or ecological communities as listed under the NSW <u>Threatened Species Conservation Act 1995</u> and/or the Commonwealth <u>Environment Protection and Biodiversity Conservation Act 1999</u>.
- 2. Development is to be situated and designed to minimise the impact on prescribed vegetation, including remnant canopy trees, understorey vegetation, and ground cover species.

Not applicable – the site is not located within the DCP Map Native vegetation.

E3 Threatened species, populations, ecological communities listed under State or Commonwealth legislation, or High Conservation Habitat

Objectives

- To protect and promote the recovery of threatened species, populations and endangered ecological communities.
- To protect and enhance the habitat of plants, animals and vegetation communities with high conservation significance.
- To preserve and enhance the area's amenity, whilst protecting human life and property.
- To improve air quality, prevent soil erosion, assist in improving water quality, carbon sequestration, storm water retention, energy conservation and noise reduction.
- To provide natural habitat for local wildlife, maintain natural shade profiles and provide psychological & social benefits.

Comments:

Not applicable.

E4 Wildlife Corridors

Objectives

- To preserve and enhance the area's amenity, whilst protecting human life and property.
- To improve air quality, prevent soil erosion, assist in improving water quality, carbon sequestration, storm water retention, energy conservation and noise reduction.
- To provide natural habitat for local wildlife, maintain natural shade profiles and provide psychological & social benefits.
- To retain and enhance native vegetation and the ecological functions of wildlife corridors.
- To reconstruct habitat in non vegetated areas of wildlife corridors that will sustain the ecological function of a <u>wildlife corridor</u> and that, as far as possible, represents the combination of plant species and vegetation structure of the original 1750 community. <u>See Warringah Natural Area Survey, August 2005</u>.

Requirements

- 1. For modification of native vegetation where the area of land supporting the vegetation to be modified is greater than 50m2 or the land supporting the vegetation to be modified forms part of an allotment where vegetation has been modified in the last five years:
- i. The applicant must demonstrate that the objectives have been achieved through a <u>Flora and Fauna</u> <u>Assessment</u> prepared in accordance with Council guidelines; and
- ii. The applicant must demonstrate that the objectives have been achieved through a <u>Biodiversity</u> <u>Management Plan</u> prepared in accordance with Council guidelines that will protect, manage and enhance wildlife corridors, and where appropriate reconstruct <u>wildlife corridor</u> areas on the subject property.
- 2. For modification of native vegetation in all other cases, the applicant must demonstrate that the objectives have been achieved.

Comments:

Not applicable.

E5 Native Vegetation

Objectives

- To preserve and enhance the area's amenity, whilst protecting human life and property.
- To improve air quality, prevent soil erosion, assist in improving water quality, carbon sequestration, storm water retention, energy conservation and noise reduction.
- To provide natural habitat for local wildlife, maintain natural shade profiles and provide psychological & social benefits.
- Promote the retention of native vegetation in parcels of a size, condition and configuration which will as far as possible enable local plant and animal communities to survive in the long term.
- To maintain the amount, local occurrence and diversity of native vegetation in the area

Comments:

Not applicable – the site is not located within the DCP Map Native vegetation.

E6 Retaining unique environmental features

Objectives

• To conserve those parts of land which distinguish it from its surroundings.

Requirements

- 1. Development is to be designed to address any distinctive environmental features of the site and on adjoining nearby land.
- 2. Development should respond to these features through location of structures, outlook, design and materials.

Comments:

Complies – the proposal has been designed to retain unique environmental features where possible.

E7 Development on land adjoining public open space

Objectives

- To protect and preserve <u>bushland</u> adjoining parks, <u>bushland</u> reserves and other public open spaces.
- To ensure that development responds to its adjacent surroundings to preserve and enhance the natural qualities of the environment.
- Development on land adjoining open space is to complement the landscape character and public use and enjoyment of the adjoining parks, <u>bushland</u> reserves and other public open spaces.

Comments:

Not applicable.

E8 Waterways and Riparian Lands

Objectives

- Protect, maintain and enhance the ecology and biodiversity of waterways and riparian land.
- Encourage development to be located outside waterways and <u>riparian land</u>.
- Avoid impacts that will result in an adverse change in watercourse or riparian land condition.
- <u>Minimise risk</u> to life and property from stream bank erosion and flooding by incorporating appropriate controls and mitigation measures.
- Maintain and improve access, amenity and scenic quality of waterways and riparian lands.

• Development on waterways and <u>riparian</u> lands shall aim to return Group B and Group C creeks to a Group A standard (as described in Warringah <u>Creek</u> Management Study, 2004) through appropriate siting and development of development.

Comments:

Not applicable.

E9 Coastline Hazard

Objectives

- To minimise the <u>risk</u> of damage from coastal processes and coastline hazards for proposed buildings and works along Collaroy Beach, Narrabeen Beach and Fisherman's Beach.
- To ensure that development does not have an adverse impact on the scenic quality of Collaroy, Narrabeen and Fisherman's Beaches.
- To ensure that development does not adversely impact on the coastal processes affecting adjacent land.

Comments:

Not applicable.

E10 Landslip Risk

Objectives

- To ensure development is geotechnically stable.
- To ensure good engineering practice.
- To ensure there is no adverse impact on existing subsurface flow conditions.
- To ensure there is no adverse impact resulting from stormwater discharge.

Requirements

- 1. The applicant must demonstrate that:
 - The proposed development is justified in terms of geotechnical stability; and
 - The proposed development will be carried out in accordance with good engineering practice.
- 2. Development must not cause detrimental impacts because of stormwater discharge from the land.
- 3. Development must not cause detrimental impact on the existing subsurface flow conditions including those of other properties.
- 4. To address Requirements 1 to 3:
- i) For land identified as being in Area A:

Council may decide that a preliminary assessment of site conditions is required. If Council so decides, a preliminary assessment of site conditions must be prepared, in accordance with the Checklist for Council's assessment of site conditions (see Notes) by a suitably qualified geotechnical engineer/ engineering geologist. The preliminary assessment must be submitted to Council before the granting of any development consent.

If the preliminary assessment determines that a geotechnical report is required, the same provisions apply in Area A as those that apply in Area B and Area D.

Comments:

Complies – the proposal is located within Area B of the Landslip Risk Area map. A geotechnical assessment has been prepared by Ascent Geo and concludes that the proposed excavation is acceptable for the site and the proposed development will not have an adverse landslip risk.

E11 Flood Prone Land

Objectives

- Protection of people.
- Protection of the natural environment.
- Protection of private and public infrastructure and assets.

Comments:

Not applicable.

Part H - Appendices

Appendix 1 Car Parking Requirements

Comments:

Complies – the proposal includes provisions for a new detached carport to accommodate on-site parking facilities for two (2) vehicles to meet the requirements of car parking rates for a dwelling house.

5. Matters for Consideration Pursuant to Section 4.15 of the Environmental Planning & Assessment Act 1979

The following matters are to be taken into consideration when assessing an application pursuant to Section 4.15 of the *Environmental Planning and Assessment Act 1979* (as amended). Guidelines (in *italic*) to help identify the issues to be considered have been prepared by the Department of Planning and Environment. The relevant issues are:

(a) The provisions of:

(i) The provision of any Environmental Planning Instrument

Comment: The proposed alterations and additions to the existing dwelling house, the construction of a swimming pool, detached carport and associated works is permissible with consent and is consistent with the intent of Warringah Local Environmental Plan 2011 and Warringah Development Control Plan 2011 as they are reasonably applied to the proposed works given the constraints imposed by the sites location, environmental and size constraints.

(ii) Any proposed instrument that is or has been the subject of public consultation under this Act and that has been notified to the consent authority (unless the Secretary has notified the consent authority that the making of the proposed instrument has been deferred indefinitely or has not been approved), and

Comment: Not applicable.

(iii) Any development control plan

Comment: The proposal has been reviewed and assessed under Warringah Development Control Plan 2011.

(iiia) Any Planning Agreement that has been entered into under section 7.4 or any draft planning agreement that a developer has offered to enter into under Section 7.4, and

Comment: Not applicable.

(iv) The Regulations (to the extent that they prescribe matters for the purposes of this paragraph), and

Comment: Not applicable.

(v) (repealed)

(b) The likely impacts of that development, including environmental impacts on both the natural and built environments and social and economic impacts in the locality, Context and Setting:

i. What is the relationship to the region and local context in terms of:

- The scenic qualities and features of the landscape
- The character and amenity of the locality and streetscape
- The scale, bulk, height, mass, form, character, density and design of development in the locality
- The previous and existing land uses and activities in the locality

Comment:

The proposal for alterations and additions to the existing dwelling house, the construction of a swimming pool, detached carport and associated works are compatible with adjoining residential

development and will not result in any unreasonable amenity impacts in terms of views, privacy or overshadowing.

ii. What are the potential impacts on adjacent properties in terms of:

- Relationship and compatibility of adjacent land uses?
- sunlight access (overshadowing)
- visual and acoustic privacy
- views and vistas
- edge conditions such as boundary treatments and fencing

Comment: These matters have been discussed in detail earlier in this report. The works have been designed such that potential impacts are minimal and within the scope of the built form controls.

Access, transport and traffic:

Would the development provide accessibility and transport management measures for vehicles, pedestrians, bicycles and the disabled within the development and locality, and what impacts would occur on:

- Travel Demand
- dependency on motor vehicles
- traffic generation and the capacity of the local and arterial road network
- public transport availability and use (including freight rail where relevant)
- conflicts within and between transport modes
- Traffic management schemes
- Vehicular parking spaces

Comment: The proposal includes provisions for a new detached carport to accommodate parking on-site for two (2) vehicles and upgrades the existing driveway and crossover to Crawford Place.

Public Domain

Comment: The proposed development will have no adverse impact on the public domain.

Utilities

Comment: Existing utility services will connect to service the dwelling.

Flora and Fauna

Comment: The proposal includes the removal of three (3) trees consisting of two (2) low-retention value category Z trees and one (1) category A tree. The application is supported by an Arboricultural Impact Assessment prepared by Hugh the Arborist. The proposal has been designed with regards to mitigate, minimise and avoid. The trees impacting the development are not significant to warrant retention and the proposal meets the relevant provisions of the SEPP.

Waste Collection

Comment: Normal domestic waste collection applies to the existing dwelling house.

Natural hazards

Comment: The site is located within Landslip Risk Area B. There are no visible natural hazards to the site. The site is not identified on the flooding or bushfire maps.

Economic Impact in the locality

Comment: The proposed development will not have any significant impact on economic factors within the area notwithstanding that it will generate additional employment opportunities through the construction period with respect to the proposed works.

Site Design and Internal Design

i) Is the development design sensitive to environmental considerations and site attributes including:

- size, shape and design of allotments
- The proportion of site covered by buildings
- the position of buildings
- the size (bulk, height, mass), form, appearance and design of buildings
- the amount, location, design, use and management of private and communal open space
- Landscaping

Comment: These matters have been discussed in detail earlier in this report. The potential impacts are considered to be minimal and within the scope of the general principles, desired future character and built form controls.

ii) How would the development affect the health and safety of the occupants in terms of:

- lighting, ventilation and insulation
- building fire risk prevention and suppression
- building materials and finishes
- a common wall structure and design
- access and facilities for the disabled
- likely compliance with the Building Code of Australia

Comment: The proposed development can comply with the provisions of the Building Code of Australia. The proposal complies with the relevant standards pertaining to health and safety and will not have any detrimental effect on the occupants.

Construction

i) What would be the impacts of construction activities in terms of:

- The environmental planning issues listed above
- Site safety

Comment: The proposal will employ normal site safety measures and procedures will ensure that no safety or environmental impacts will arise during construction.

(c) The suitability of the site for the development

- Does the proposal fit in the locality
- Are the constraints posed by adjacent development prohibitive
- Would development lead to unmanageable transport demands and are there adequate transport facilities in the area
- Are utilities and services available to the site adequate for the development
- Are the site attributes conducive to development

Comment: The site is located in an established residential area. The adjacent development does not impose any unusual or impossible development constraints. The proposed development will not cause unmanageable levels of transport demand with the existing use of a dwelling house to remain.

(d) Any submissions received in accordance with this act or regulations

Comment: No submissions are available at this time.

(e) The public interest

Comment: The proposed works are permissible and consistent with the intent of WLEP2011 and WDCP controls as they are reasonably applied to the proposal for alterations and additions to the existing dwelling house, swimming pool, detached carport and associated works, the development would not be contrary to the public interest.

In our opinion, the development satisfies the planning regime applicable to development on this particular site having regards to the considerations arising from its context.

The proposal is acceptable when assessed against the heads of consideration pursuant to Section 4.15 of the *Environmental Planning and Assessment Act, 1979* (as amended), and is appropriate for the granting of consent and accordingly, is in the public interest.

6. Summary and Conclusion

The proposal for alterations and additions to the existing dwelling house, swimming pool, detached carport and associated works is permissible with consent and consistent with the intent of the built form controls as they are reasonably applied to the proposed works. It is considered that the proposal is appropriate on merit and is worthy of the granting of development consent for the following reasons:

- The merits of the application have been assessed in accordance with the provisions of the relevant requirements of WLEP 2011 and the provisions of Section 4.15 of the Environmental Planning and Assessment Act 1979 (as amended). There is no evidence that the impacts of the development would warrant amendment to the subject proposal or justify refusal. Where a variation is proposed, adequate documentation has been provided to support the application.
- The nature of the development is appropriate having regard to the area of the site, its geographical location, topography, constraints and adjoining land uses.
- The Development Application is supported by a Clause 4.6 Variation to Development Standard which outlines that compliance with Clause 4.3 is unnecessary and unreasonable in this instance and environmental planning grounds are well founded.

Accordingly, the proposal for alterations and additions to the existing dwelling house, swimming pool, detached carport and associated works at 5 Crawford Place, Beacon Hill, being Lot 23 within Deposited Plan 217829, is acceptable from environmental, social, and planning perspectives and approval should therefore be granted by Council.
